

Tim Presley

Head of User Experience | Design Systems, UX Strategy & AI-Enabled Product Teams

Houston, TX | 210-834-9510 | tpresley1764@gmail.com | linkedin.com/in/tim-presley-6a133514

PROFESSIONAL SUMMARY

UX executive with 28+ years leading design transformation across complex enterprise software portfolios. Builds and leads high-performing, multidisciplinary design teams, and has been an early adopter of AI-augmented design workflows — embedding AI-assisted tooling, research synthesis, and design-to-development automation into day-to-day team practice years ahead of broader industry adoption. Deep expertise in enterprise design systems, UX governance, and translating research and AI-generated insight into product roadmap decisions.

CORE COMPETENCIES

UX Leadership & Team Development • AI-Enabled Design Operations • Enterprise Design Systems at Scale • UX Strategy & Roadmap Influence • Design Governance • Cross-Functional & Executive Stakeholder Management • AI-Augmented Research & Documentation • Accessibility (WCAG) • Agile / Lean Delivery • Mentorship & Org Development

PROFESSIONAL EXPERIENCE

Head of User Experience, Digital Drilling Portfolio

Oct 2024 – Present

Halliburton – Sperry Drilling | Houston, TX

- Lead UX strategy, team, and an AI-enabled operating model for a global digital drilling software portfolio (LOGIX, MaxReceiver, Design of Service) supporting real-time, high-stakes operational decision-making.
- Built and lead a multidisciplinary design team — hiring, onboarding, and mentoring designers — while embedding AI-assisted workflows into daily practice, including a Claude API-powered internal design system application and GitHub Copilot Agent mode for design-to-development handoff.
- Architected an AI-informed, token-based enterprise design system (Style Dictionary v5 pipeline) with a governed Storybook component library, reducing implementation variance across engineering teams.
- Directed a unified operating model spanning research standards, intake processes, design QA, and AI-governed documentation practices, improving delivery predictability across the team.
- Shipped Design of Service (DOS) to production for international operations (Norway), leading the team from research through go-live.
- Partner with product and engineering leadership, translating AI-augmented research insight into prioritized roadmap decisions.

Head of User Experience – Enterprise Energy Solutions

Nov 2021 – Oct 2024

Halliburton – Landmark | Houston, TX

- Led and scaled a UX organization across a large enterprise SaaS portfolio (reservoir modeling, drilling, and geoscience applications) in a matrixed environment.
- Directed multidisciplinary design teams across multiple product lines, managing people, process, and technical direction across concurrent workstreams.
- Rebuilt UX foundations — intake, prioritization, research cadence, and review structures — reducing design-to-development churn by 25–40% and improving release predictability.
- Standardized design systems, accessibility (WCAG) practices, and workflow patterns across the product ecosystem.
- Piloted early AI-assisted design and documentation tooling within the team, laying the operating foundation for the AI-enabled design practice later scaled at Sperry Drilling.

EARLIER CAREER

Senior UX Designer, Halliburton Landmark — Lead UX Designer, Pearson (Healthcare & Education Platforms) — Lead UX Designer, Security Service Federal Credit Union — Manager, UX & Web Development, UT Health San Antonio — Manager, UI Design, Texas Management Associates (USAF)

EDUCATION

M.Ed., Educational Technology — University of Texas Rio Grande Valley

B.S., Computer Science — Park University

A.A., Graphic & Multimedia Design — Texas State Technical College

TOOLS & METHODS

Figma • Design Tokens / Style Dictionary • Storybook • Angular / PrimeNG • AI-Augmented UX Workflows (Claude API, GitHub Copilot Agent) • Agile / Lean Delivery • WCAG Accessibility • Analytics
