

Tim Presley

Principal UX Designer | Design Systems & AI-Enabled Workflows

Houston, TX | 210-834-9510 | tpresley1764@gmail.com | linkedin.com/in/tim-presley-6a133514

PROFESSIONAL SUMMARY

Principal-level UX designer with 28+ years of hands-on craft and systems leadership across complex enterprise software platforms. Deep technical depth in architecting token-based design systems and component libraries, paired with early, practical expertise pioneering AI-augmented design workflows — from AI-assisted documentation and design-to-development automation to AI-powered internal tooling. Known for driving cross-functional technical influence and elevating design system adoption across engineering organizations without relying on management authority.

CORE COMPETENCIES

Design Systems Architecture • Token-Based Design Infrastructure • AI-Augmented UX Workflows • Cross-Functional Technical Partnership • Human-Centered & Systems Design • Design-to-Development Enablement • Design Craft Mentorship • Research-Driven Design • Accessibility (WCAG) • Agile / Lean Practice

PROFESSIONAL EXPERIENCE

Principal UX Designer, Digital Drilling Portfolio

Oct 2024 – Present

Halliburton – Sperry Drilling | Houston, TX

- Architected the enterprise design system for a global digital drilling software portfolio (LOGIX, MaxReceiver, Design of Service) — a token-based system built on a Style Dictionary v5 pipeline with a governed Storybook component library.
- Pioneered AI-augmented design workflows across the practice, building a Claude API-powered internal design system application and integrating GitHub Copilot Agent mode into the design-to-development handoff, materially accelerating delivery velocity.
- Drove design system adoption across a multi-product engineering ecosystem through direct technical partnership with engineering teams, ensuring component consistency and reducing implementation variance.
- Shaped research standards, design QA practices, and AI-assisted documentation workflows adopted across the team.
- Owned the end-to-end design of Design of Service (DOS) from research through production launch for international operations (Norway).
- Mentor designers on design system usage, craft standards, and AI-assisted workflow practices.

Principal UX Designer – Enterprise Energy Solutions

Nov 2021 – Oct 2024

Halliburton – Landmark | Houston, TX

- Rebuilt UX and design system foundations across a large, matrixed enterprise SaaS organization spanning reservoir modeling, drilling, and geoscience applications.
- Standardized design systems and accessibility (WCAG) practices across a multi-product portfolio, reducing design-to-development churn by 25–40% through improved component consistency and design QA rigor.
- Partnered directly with engineering and product leadership to translate complex technical requirements into scalable, reusable design patterns.
- Began piloting AI-assisted design tooling ahead of broader organizational adoption, laying the technical groundwork for the AI-augmented design practice later scaled at Sperry Drilling.

EARLIER CAREER

Senior UX Designer, Halliburton Landmark — Lead UX Designer, Pearson (Healthcare & Education Platforms) — Lead UX Designer, Security Service Federal Credit Union — Manager, UX & Web Development, UT Health San Antonio — Manager, UI Design, Texas Management Associates (USAF)

EDUCATION

M.Ed., Educational Technology — University of Texas Rio Grande Valley

B.S., Computer Science — Park University

A.A., Graphic & Multimedia Design — Texas State Technical College

TOOLS & METHODS

Figma • Design Tokens / Style Dictionary • Storybook • Angular / PrimeNG • AI-Augmented Design Workflows (Claude API, GitHub Copilot Agent) • Systems Thinking • WCAG Accessibility • Agile / Lean Practice
